

LASER WELDING MACHINE

- ❖ High efficiency, High Precise & High Speed
- ❖ Compact design, easy to move
- ❖ Beautiful welding beam
- ❖ Easy Operation & less skill needed
- ❖ Low-cost maintenance.
- ❖ Light torch, suitable for long working time
- ❖ Temperature alarm function Torch
- ❖ Swiss Brand (Raytool) torch works more stable

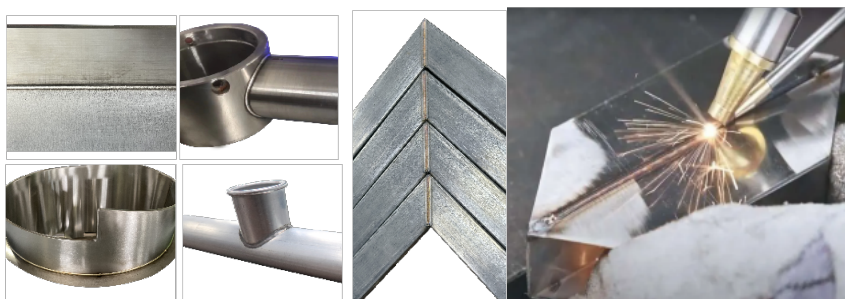

TECHNOLOGY PARAMETERS

Laser power	1000W,1500W,2000W
Centre wavelength	1080NM
Laser frequency	50Hz-5KHz
Adjustable power range	0-100%
Optimal operating environment	Temperature 0-40°C, humidity 20%-80%
Electricity demand	AC220V(1kw-2kw)Single Phase plug
Fiber length	8m
Cooling method	Industrial thermostatic water tank (304 stainless steel material)
Dimensions	690(L)*390(W)*590mm(H)
Welding seam requirement	≤1.2mm
Type of water used	Distilled /purified water
Weight	85kg

OUR EXPERIENCES:

- ❖ We are professional in laser welding.
- ❖ We offer customer In House LIVE DEMO, to let them see the effect they enquiry.
- ❖ We help customer to increase their productivity with high quality finishing by innovative technology.
- ❖ We provide professional technical team, ready to serve you better.
